Zimmer Dental® finally updated its Tapered Screw-Vent developed in 1999 by Dr. Gerald Niznick. Zimmer® added micro-grooves and extended the HA blasted surface to the top.

Zimmer used this change to raise the list price from \$386 to \$396

Implant Direct launched the Legacy™1 implant in 2007, also developed by Dr. Gerald Niznick. It offers both surgical and prosthetic compatibility with the Tapered Screw-Vent, as well as the same type of HA blasted surface. From the inception, the Legacy™1 extended the blasted surface to the top and provided its patented Micro-threads (not micro-grooves) for added stability.

The only price change in 4 years has been to lower the price from \$150 to \$125

Patented Micro-Threads For Added Stability
