Multi-Dimensional Approach to Implant Dentistry

A Comprehensive Hands-On Training Course

Course Description:

Implant Direct International, under the direction of prosthodontist and implantology pioneer Dr. Gerald Niznick, has developed the industries' broadest line of application specific dental implants and abutments. Successful implant outcomes require the use of the appropriate components plus proper consideration for numerous anatomical and biomechanical factors. This one-day, surgical and prosthetic hands-on course walks you through a wide array of implant products and procedures – leaving you with a clear understanding to begin treatment planning single tooth replacements as well as Teeth-in-1Day™ restoration of fully edentulous jaws.

Just a few of the things you'll learn...

- Simple implant cases – immediate placement of an implant into an extraction socket
- Soft tissue management and abutment selection for optimum esthetics in the anterior maxilla
- How to increase initial stability to allow immediate temporization following implant placement
- Treatment planning and execution of implant-retained and/or supported overdentures
- Bone augmentation indications, options and procedures

Course Objectives:

Esthetic Zone
Narrow diameter Legacy™3 implants and zirconia abutments replace congenitally missing lateral

Teeth-in-1Day™
Two straight and two angled RePlant® implants placed for restoration of a fully-edentulous maxilla

Dentistry by Dr. Fernan Lopez Dentistry by Dr. Pedro Peña

Presenter: Dr. Gary O'Brien
Gary O'Brien, DDS graduated from the University of Southern California School of Dentistry in 1981 with Highest Honors and has been placing implants in his private practice for 28 years. He began practicing with Dr. Niznick in 1985 and became a key lecturer for Core-Vent Implant Company. He has assisted in research studies at the Mayo Clinic Department of Periodontology and has taught at numerous education institutes and symposiums throughout the USA and Europe. Dr. O'Brien has lectured to thousands of dentists on implant placement and restorative procedures. He is an expert in practice management and has built one of the most successful general dentistry practices in California based on the use of dental implants as an integral part of treatment planning.
