Mini-threads with Double-lead Threads for Faster Insertion

The bodies of the Legacy1, Legacy2, Legacy3 and Legacy4 implants are tapered to facilitate insertion in an undersized socket (stop at intermediate drill) for expansion in soft bone. This increases initial stability (G. Niznick: *Clinical Oral Health 2000 "Achieving Success in Soft Bone"*). The SBM textured surface extends over the entire endosseous portion of the Legacy system implants. Mini-threads start 1mm below the crest of the bone and extend for 2.0-2.5mm before transitioning into double-lead threads to the apex of the implant. The mini-threads are half the depth and half the distance between adjacent peaks compared to the double-lead threads that extend to the apex of the implant. Mini-threads reduce stress in the critical crestal bone region while double-lead threads reduce the number of turns required to seat the implant. Vertical cutting grooves extend up the implant from the apex for self-tapping insertion.

SBM™ and HA Coated Surface Options

SBM surface is created by using a Soluble Blast Media of Hydroxylapatite (HA) crystals to create a medium-rough texture. We use the same vendor for SBM and HA coated surface treatments as used by Paragon Implant Company from 1992-2000 when these studies were conducted.

SEM's of Our Surfaces

Mini-threads textured by blasting with SBM: Blasted with Soluble HA Particles
HA Coating: High Crystalline 40u layer

Animal Studies Bone Response to SBM Surface

Legacy1

Legacy1 Implant System Features & Benefits

- Internal connection with 1.5mm long hex & internal bevel
- Tapered body allows insertion using Tapered Screw-Vent® drills (except the 5.7mmD implant uses 5.4/4.8mmD Step Drill)
- Surface options: SBM (Soluble Blast Media) textured or HA-coated
- Double-lead "V" threads for 2X faster insertion & quadruple-lead threads near top for increased thread engagement & reduced stress
- 2mm extender retained by cover screw for use as a healing collar for one stage surgery
- Two self-tapping grooves, extending halfway up implant

Placing Implant with Carrier

Color coded titanium carrier

Use indents on carrier to align implant hex

Attach cover screw and extender to implant

Suture soft tissue around extender

Legacy1: Two-Piece Implant for Two-Stage Surgery

SBM and HA Surface Implants Includes Cover Screw, Extender & Carrier/Transfer

Legacy2 Implant System Features & Benefits

- Internal connection with 1.5mm long hex & internal lead-in bevel
- Body is straight for top 1/3rd with bottom 2/3rds tapered for bone expansion. Surgically compatible with Tapered Screw-Vent® drills (except the 5.7mmD Implant uses 5.4/4.8mmD Step Drill)
- Surface options: SBM (Soluble Blast Media) textured or HA-coated
- Double-lead buttress threads for improved insertion & quadruple-lead threads near top for increased thread engagement & reduced stress
- 2mm extender retained by cover screw for use as a healing collar for one stage surgery
- Color-coded carrier usable as a closed-tray transfer & temporary abutment
- Three aggressive self-tapping grooves extending 2/3rds length up the implant

Legacy2: Two-Piece Implant for Two-Stage Surgery

SBM and HA Surface Implants Includes Cover Screw, Extender & Carrier/Transfer Extender NOT supplied with 6mmL implant

Legacy3

Legacy3 Implant System Features & Benefits

- Internal connection with 1.5mm long hex & internal lead-in bevel
- Tapered body allows insertion using Tapered Screw-Vent® drills for 3.7mmD, 4.2mmD & 4.7mmD implants only
- Surface options: SBM (Soluble Blast Media) textured or HA-coated
- Double-lead buttress threads for improved insertion & initial stability, quadruple-lead threads near top for increased thread engagement & reduced stress
- 2mm extender retained by cover screw for use as a healing collar or for one or two-stage surgery
- Color-coded carrier usable as a closed-tray transfer and/or final full-contour abutment
- Two self-tapping grooves, extending halfway up implant

Legacy4 Implant System Features & Benefits

- Revolutionary new, two-piece fixture-mount. Top includes torque-safety feature and detaches in impression for metal-to-metal transfer accuracy
- Fixture-mount may be shortened at the line to function as a final preaparable abutment
- 2mm extender retained by cover screw for use as a healing collar for one-stage surgery features a concave transgingival profile which matches the fixture-mount
- Internal connection with 1.5mm long hex & internal lead-in bevel
- Body is straight for top 1/3rd with bottom 2/3rds tapered for bone expansion. Surgically-compatible with Tapered Screw-Vent® drills (except the 5.7mmD implant uses 5.4/4.8mmD Step Drill)
- Double-lead buttress threads for improved insertion and quadruple-lead threads near top for increased thread engagement & reduced stress
- Surface options: SBM (Soluble Blast Media) textured or HA-coated
- Three aggressive self-tapping grooves extend 2/3rds length up the implant

Legacy4: Two-Piece Implant for Two-Stage Surgery

Legacy Implant Vial and Cap Label

Legacy Prosthetic Vial and Cap Label

- | | |
|--|--|
| | 1) Our products carry the CE mark and fulfill the requirements of the Medical Device Directive 93/42/EEC |
| | 2) Manufacturer Symbol |
| | 3) Product code or reference number |
| | 4) Product description |
| | 5) Caution: US law restricts the sale of these devices by or on the order of a dentist or physician |
| | 6) Do not re-use symbol |
| | 7) Use by date (XXXX-XX) |
| | 8) Sterilized using gamma irradiation symbol |
| | 9) Refer to Instructions For Use (IFU) |
| | 10) Tamper proof symbol |
| | 11) Lot number (XXXXXXXXXX) |
| | 12) Implant body diameter color reference on surgical tray |
| | 13) Implant prosthetic platform diameter (written and color-coded) |
| | 14) Non-sterile symbol |

Legacy Fixture-Mount Packaging

The implant is mounted on a color-coded Carrier/Transfer. A cover screw and extender are included in each vial.

Prepare surgical site with double cutting step drill

All the implants come in a sterile vial

Each vial label is color-coded with two tear-off labels

Each cap label is color coded by platform diameter of implant

Drop implant assembly out of vial onto a sterile surface

Remove implant assembly with insertion tool & drill or ratchet

Insert implant into osteotomy

Index fixture-mount flat to labial

Remove fixture-mount

Align the flat of the fixture mount to the labial

Remove the holder containing the cover screw & extender

Unscrew the cover screw & extender

Attach the cover screw to implant

Suture soft tissue over cover screw

Attach the cover screw & extender to implant

Suture soft tissue around cover screw & extender

A Legacy of Innovation

Implant Direct
simply smarter.

Legacy 4 – the culmination of 30 years of evolution

Introducing a revolutionary 2-piece fixture-mount/abutment that provides the accuracy of an open-tray transfer with the simplicity of a closed-tray transfer.

Square top detaches with the impression, providing a snap attachment for abutment/analog.

The abutment portion of the fixture-mount snaps onto the transferred top for the accuracy of a metal-to-metal connection

All trademarks are property of their respective companies.
Price comparisons based upon US list prices as of January 2013.
